INTERNAL QUALITY ASSURANCE CELL

Faculty Feedback Summary

Faculty feedback is collected annually as a regular practice.

Sl. No	Academic Year	Number of respondents
1.	2022-23	219
2.	2021-22	207
3.	2020-21	192
4.	2019-20	215
5.	2018-19	243

The curriculum is prepared based on feedback from faculty members and. This feedback is discussed and refined in the respective Board of Studies. Inputs from stakeholders are thoroughly deliberated in the Academic Council and incorporated into the curriculum. The recommendations of the Academic Council are then approved by the Governing Body.

Department of Electrical and Electronics Engineering Action Taken Report on Faculty Feedback Analysis on Curriculum AY 2022-2023

B. E. Programme

Here are insights based on the feedback along with actionable steps taken to address specific areas of concern:

1. Alignment with Program Outcomes: The curriculum aligns reasonably well with the stated Program Outcomes (POs), with 55% rating it as excellent and 45% as very good.
2. PO Coverage: Significant concerns with 45% rating PO coverage as poor, indicating a need to enhance how POs are addressed within the curriculum.
3. Pedagogical Approaches: - Overall, the pedagogical approaches are well-received (60% excellent, 27% very good), but with 13% good, indicating room for minor improvements.
4. Teaching Methods and Engagement: - Very positive feedback on teaching methods promoting engagement (81% excellent).
5. Curriculum Structure and Organization: - Generally viewed as well-structured but with a small percentage indicating room for improvement (6% good).
6. Topic Sequencing: Similarly, topic sequencing is well-regarded, but a small proportion (4% good) suggests there is scope to enhance how topics are sequenced for better understanding.
7. Resource Availability: Strongly positive responses indicate that resources to support the curriculum are adequate.
8. Faculty Support: While largely positive, there is a noted need for increased support as indicated by 6% good responses.
9. Industry Orientation and Employability: High approval of the curriculum's relevance to industry and skill enhancement.
10. Overall Satisfaction: High overall satisfaction with the current curriculum (63% excellent, 47% very good), reflecting general contentment with the educational offerings.

RV College of Engineering®

Mysore Road, RV Vidyaniketan Post,
Bengaluru - 560059, Karnataka, India

Actions Taken:

1. **Enhancing PO Coverage:** Reviewed specific areas where PO coverage is perceived as lacking. Initiate curriculum revisions to ensure a comprehensive incorporation of all Program Outcomes.
2. **Pedagogical Improvement Initiatives:** Offered professional development opportunities for instructors focusing on innovative pedagogical strategies. Introduce new learning technologies to enhance student interaction and participation in classes.
3. **Curriculum Review for Structure and Sequencing:** Conducted a thorough review of the curriculum structure and sequencing. Gather input from faculty and students to identify specific areas for enhancement.
4. **Increase Faculty and Resource Support:** Evaluated and bolstered faculty support mechanisms to ensure instructors have the necessary tools and resources to deliver high-quality education. Addressed any gaps in resource provision that could affect teaching effectiveness or curriculum delivery.
5. **Industry Alignment and Skills Enhancement:** Strengthened ties with industry to keep the curriculum aligned with current and future job market needs. Increased the focus on practical skills and employability through workshops, real-world projects, and internships.
6. **Ongoing Curriculum Evaluation:** Established regular feedback loops with students and faculty to continuously monitor and refine the curriculum based on direct feedback and changing educational or industry standards.

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS
ATR of Faculty Feedback Analysis (2022-23)

Department	Stakeholder	Feedback received	Action taken
Department of Master of Computer Applications	Faculty	84% of the faculty members agree that courses are aligned and are sufficiently addressed in the curriculum.	as per the opinion of the stake holders during the syllabus revision discussion, introduction of new courses was made to elective stream to increase the number of courses from 3 to 4. Software based solution courses were moved from elective to course.
		90% of the faculty members opined that the curriculum is well structured and sequenced. The mode of teaching through pedagogy and new approaches helps students in better understanding the courses	The reorganization of syllabus structure to align with the university was made during the syllabus revision. A collaboration was realised with experts from industry for conduction of courses. A team of faculty members were also trained by the experts to gain an insight of how industry looks at the courses.
		Majority faculty members opined that the 2022 scheme syllabus was more appropriate but loaded with too many topics	Faculty worked in teams for the electives to bring out the best possible TLP in the department to make students industry ready.

Department of Electrical and Electronics Engineering
Action Taken Report on Faculty Feedback Analysis on Curriculum
AY 2021-2022
B. E. Programme

Based on the provided feedback analysis, here are specific actions taken to address various aspects of the UG curriculum:

1. Alignment with Program Outcomes (POs):

- Conducted a thorough review of the curriculum to ensure alignment with stated Program Outcomes.
- Implemented changes to strengthen alignment where necessary, based on the feedback received.

2. Emphasis on Addressing POs:

- Identified Program Outcomes that were not adequately addressed in the curriculum.
- Developed strategies to emphasize and integrate these POs more effectively into course content.

3. Enhancement of Pedagogical Approaches:

- Introduced innovative pedagogical methods to enhance student learning experiences.
- Provided training and workshops for faculty to improve pedagogical skills and techniques.

4. Promotion of Student Engagement:

- Implemented teaching methods aimed at promoting active student engagement in the learning process.
- Encouraged collaborative learning activities and projects to enhance student participation.

5. Curriculum Structure and Organization:

- Reviewed and refined the structure and organization of the curriculum to ensure clarity and coherence.
- Implemented changes to improve the sequencing of topics for better student understanding.

6. Resource Allocation and Support:

- Ensured adequate resources are available to support the delivery of the curriculum.
- Provided faculty with necessary support and resources to effectively teach the curriculum.

7. Industry Orientation and Employability:

- Strengthened industry partnerships to make the curriculum more industry-oriented.
- Incorporated industry-relevant projects, case studies, and guest lectures to enhance students' employability skills.

8. Overall Satisfaction with Curriculum:

- Took into account overall feedback to continuously monitor and improve the curriculum.
- Implemented changes based on faculty and student suggestions to enhance overall satisfaction.

Action taken – Faculty feedback (2021-22)

**Department of Electronics and Instrumentation Engineering
B. E Programme**

Action taken report (ATR)

Department	Stakeholder	Feedback received	Action taken
EIE	Faculty	<ul style="list-style-type: none"> 100% of the faculty expressed that the pedagogical approaches used in the curriculum enhanced student learning. 100% of the Faculty agreed that the course should be industry oriented which in turn would address employability skills. More awareness needed towards research. Encourage students to take up real time application for Assignment, EL. 	<ul style="list-style-type: none"> Periodic review was conducted to monitor students' activity. Design Thinking Labs were introduced. Students and faculty were given an opportunity to work in different Centres of Excellence depending on their interest. EL components will be given more weightage in CIE Evaluation.

DEPARTMENT OF ELECTRONICS & TELECOMMUNICATION ENGINEERING

Action Taken-2021

B. E. Programme

Based on the provided feedback analysis, here are specific actions taken to address various aspects of the UG curriculum:

1. Alignment with Program Outcomes (POs):

- Conducted a thorough review of the curriculum to ensure alignment with stated Program Outcomes.
- Implemented changes to strengthen alignment where necessary, based on the feedback received.

2. Emphasis on Addressing POs:

- Identified Program Outcomes that were not adequately addressed in the curriculum.
- Developed strategies to emphasize and integrate these POs more effectively into course content.

3. Enhancement of Pedagogical Approaches:

- Introduced innovative pedagogical methods to enhance student learning experiences.
- Provided training and workshops for faculty to improve pedagogical skills and techniques.

4. Promotion of Student Engagement:

- Implemented teaching methods aimed at promoting active student engagement in the learning process.
- Encouraged collaborative learning activities and projects to enhance student participation.

5. Curriculum Structure and Organization:

- Reviewed and refined the structure and organization of the curriculum to ensure clarity and coherence.
- Implemented changes to improve the sequencing of topics for better student understanding.

6. Resource Allocation and Support:

- Ensured adequate resources are available to support the delivery of the curriculum.
- Provided faculty with necessary support and resources to effectively teach the curriculum.

7. Industry Orientation and Employability:

- Strengthened industry partnerships to make the curriculum more industry-oriented.
- Incorporated industry-relevant projects, case studies, and guest lectures to enhance students' employability skills.

8. Overall Satisfaction with Curriculum:

- Took into account overall feedback to continuously monitor and improve the curriculum.
- Implemented changes based on faculty and student suggestions to enhance overall satisfaction.

Faculty Feedback Analysis on Curriculum
2021-2022
B. E. Programme

Feedback Received	Action Taken
1)Majority faculty expressed that the curriculum should enhance student learning. Faculty agreed that the course should be industry oriented and addresses employability skills.	1)Students and faculty were given an opportunity to work in different Centre of Excellence depending on their interest.
2)Respondents expressed satisfaction with the current curriculum.	2)Regular suggestion was given to students to improve the application. Design Thinking Labs were introduced.
3)More awareness needed towards Continuous monitoring of student's activity. Encourage students to take up real time application for Assignment, EL.	3)Periodic review was conducted to monitor students activity.

Dept of Mechanical Engineering

ACTION TAKEN SAMPLE: FACULTY FEEDBACK

Action Taken Report on Student Feedback received during 2021-22

Faculty Feedback	Action taken
<p>1. How well the UG/PG curriculum aligns with the stated Program Outcomes (POs) of the ME program:</p> <p>2. How do you rate POs you believe are adequately addressed or emphasized in the curriculum?</p> <p>3. How well the pedagogical approaches used in the curriculum enhance student learning?</p> <p>4. How well the teaching methods employed in the curriculum promote student engagement?</p> <p>5. The curriculum for the course is well-structured and organized</p> <p>6. The sequencing of topics in the curriculum facilitates student understanding</p> <p>7. Adequate resources are available to support the delivery of the curriculum:</p> <p>8. As faculty you receive sufficient support to effectively teach the curriculum:</p> <p>9. Is the course industry-oriented/addresses employability/enhances the skills?</p> <p>10. Overall, I am satisfied with the current curriculum:</p>	<p>To conduct a comprehensive analysis of the curriculum's alignment with program outcomes, a detailed review of each component is essential.</p> <p>Firstly, the program outcomes need to be thoroughly reviewed to identify strengths and areas needing improvement. By mapping these outcomes to the curriculum, areas where the curriculum effectively addresses program outcomes can be identified. Strategies to enhance alignment for areas with lower ratings can then be developed. This may involve revising course content, introducing new modules, or redesigning assessments.</p> <p>Pedagogical approaches employed in the curriculum should also be evaluated. By considering feedback and student performance, areas where pedagogical methods effectively enhance learning can be identified. Suggestions for improvement, such as incorporating more interactive activities or adopting innovative teaching techniques, can be implemented to better support student learning outcomes.</p> <p>Assessing the effectiveness of teaching methods in promoting student engagement is crucial. Identifying successful teaching methods and developing strategies to enhance engagement levels, particularly in areas with lower ratings, can significantly improve the learning experience.</p> <p>The structure and organization of the curriculum should be reviewed to identify strengths and weaknesses. Adjustments may be necessary to enhance organization and coherence, ensuring seamless progression through the curriculum.</p>

Dept of Mechanical Engineering

	<p>Sequencing of topics should be evaluated to determine if it effectively supports student understanding. Adjustments may be needed to optimize comprehension and learning outcomes.</p> <p>Assessing the availability and sufficiency of resources for curriculum delivery is vital. Additional resources may be required to support effective curriculum delivery, and advocating for resource allocation is necessary to ensure adequate support.</p> <p>Faculty support for teaching the curriculum should also be evaluated. Identifying areas where additional support may be needed and advocating for resources and support mechanisms can enhance faculty effectiveness.</p> <p>Aligning course content and structure with industry needs and employability is essential. Collaborating with industry partners to integrate relevant skills and knowledge into the curriculum can improve alignment with employment opportunities.</p> <p>Overall satisfaction ratings should be reviewed to identify areas of strength and areas for improvement. Using feedback to make informed decisions about potential changes or enhancements to the curriculum is crucial for continuous improvement. Monitoring satisfaction levels and adjusting the curriculum as needed ensures it meets the needs and expectations of stakeholders.</p>

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS
ATR of Faculty Feedback Analysis (2021-22)

Department	Stakeholder	Feedback received	Action taken
Department of Master of Computer Applications	Faculty	88% of the faculty members agree that courses are aligned and are sufficiently addressed in the curriculum.	20MCA333 and 20MCA351 were the courses not opted by students under the respective elective streams. Discussions were made with the various stack holders and faculty of the department about the courses and their content. It was noted to take care of this in next syllabus revision.
		84% of the faculty members opined that the curriculum is well structured and sequenced. The mode of teaching through pedagogy and new approaches helps students in better understanding the courses	A complete shift of conducting online assessments was a challenge. The question paper preparation, evaluation through online tools was a new learning for both faculty and students. Virtual classrooms sessions were adopted. A complete shift from traditional TLP happened.
		Majority faculty members opined that the 2020 scheme syllabus was more appropriate but loaded with too many topics	Faculty worked in teams for the electives to bring out the best possible TLP in terms of conduction of classes, self-study and conduction of assessment more effectively

Department of Electrical and Electronics Engineering

Action Taken Report on Faculty Feedback Analysis on Curriculum

AY 2020-2021

B. E. Programme

Based on the provided feedback analysis, here are specific actions to enhance curriculum alignment, pedagogy, and support systems

Actions for Enhancing Curriculum Alignment and PO Coverage:

1. ****Curriculum Review and Alignment:** Conduct a detailed curriculum review to ensure it aligns with Program Outcomes, especially in areas where there is a substantial percentage of excellent and very good responses but a presence of good responses indicates room for improvement.

- Address the significant gap where 45% rated PO coverage as poor by identifying specific POs that are underrepresented in the curriculum and strengthening their inclusion.

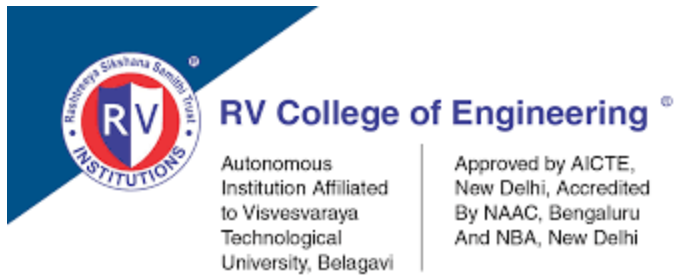

2. **Faculty Workshops and Training:-** Organize workshops and training sessions for faculty on effective integration of POs into course content, emphasizing areas where feedback shows inadequate PO coverage.

3. ****Enhanced Curriculum Resources:** Developed additional resources, such as case studies, real-world projects, and interdisciplinary assignments, that help illustrate and integrate POs more effectively.

Actions for Improving Pedagogical Approaches and Student Engagement: Pedagogical Innovation: - Introduced innovative teaching methods that are student-centered and enhance learning and engagement, such as flipped classrooms, collaborative projects, and problem-based learning, especially in areas where ratings indicate room for improvement.

2. **Continuous Professional Development:** Provided ongoing professional development opportunities for faculty focused on modern pedagogical strategies to enhance student learning and engagement.

3. ****Feedback Mechanisms:** Implemented regular and structured feedback mechanisms that allow students to provide input on teaching methods and curriculum effectiveness, helping educators adjust approaches to better meet student needs.

Actions for Resource Availability and Faculty Support:

1. Resource Enhancement - Assessed and upgraded the resources available to students and faculty, including software, laboratory equipment, and learning materials, especially in courses where feedback on resources was less favorable.
2. Support Systems for Faculty: Ensured that faculty receive sufficient institutional support, including access to teaching assistants, technological tools, and administrative assistance, to effectively deliver the curriculum.

Actions for Industry Orientation and Employability:

1. Industry Collaboration:

- Strengthened partnerships with industry to ensure the curriculum remains relevant to current and future industry needs, enhancing employability and practical skills.
- Invited industry professionals to contribute to the curriculum through guest lectures, real-world case studies, and mentorship programs.

2. Skills Development Programs:**

- Implemented targeted skills enhancement workshops and certification programs that align with industry demands, improving student preparedness for the job market.

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS

ATR of Faculty Feedback Analysis (2020-21)

Department	Stakeholder	Feedback received	Action taken
Department of Master of Computer Applications	Faculty	88% of the faculty members agree that courses are aligned and are sufficiently addressed in the curriculum.	Networks, Data Science and Software solution design and development courses were introduced in elective stream, enabling students to pursue their interest in the said domain. The courses were designed from basics to advanced level in 2 nd and 3 rd semester MCA. Technical seminar course was introduced additionally with minor and major projects to emphasis on role of engineers with societal and environmental concern.
		84% of the faculty members opined that the curriculum is well structured and sequenced. The mode of teaching through pedagogy and new approaches helps students in better understanding the courses	Latest tools and technologies usage is volunteered and encouraged among the faculty members. Integrated courses are taught through practical approach. The new normal of pandemic COVID-19 generated a situation for faculty and students to adopt to a new environment of online academics. Both faculty and students explored the potential of tools for online discussion and session conduction.
		Majority faculty members opined that the 2020 scheme syllabus (2 year course) was more appropriate but loaded with too many topics	Discussions were conducted to figure out how to capture all the essence of the course without over burdening the student. As the MCA course duration was reduced from 3 to 2 years but the course content was not compromised.

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS
ATR of Faculty Feedback Analysis (2019-20)

Department	Stakeholder	Feedback received	Action taken
Department of Master of Computer Applications	Faculty	87% of the faculty members agree that courses are aligned and are sufficiently addressed in the curriculum	Assignments, minor projects and Major projects are aligned and aimed towards societal, environmental and sustainable solution designs
		86% of the faculty members opined that the curriculum is well structured and sequenced. The mode of teaching through pedagogy and new approaches helps students in better understanding the courses	New tools and technologies usage is volunteered and encouraged among the faculty members. Integrated courses are taught through practical approach. Use of Git and GitHub is Encouraged for showcasing and wide reach of students learning
		32% of faculty opined that some improvement is needed and to incorporate the courses more relevant to industry	Discussions were made with alumni, employers and other stake holders to bring in the more industry-oriented topics into the curriculum.

DEPARTMENT OF INDUSTRIAL ENGINEERING & MANAGEMENT

Action Taken Report on Faculty Feedback Analysis on Curriculum AY 2018-19

Programme : B. E.

Department	Stake Holders	Feedback Insights	Action Taken
Industrial Engineering & Management	Faculty	<ul style="list-style-type: none"> 50% of faculty believe that majority of the Program Outcomes are adequately addressed or emphasized in the curriculum. Some noted that few POs were well-covered, and others were not covered at all. Majority faculty expressed that the pedagogical approaches used in the curriculum enhanced student learning. 75% respondents confirmed that adequate resources are available to support the delivery of the curriculum. They highlighted the availability of smart classrooms particularly beneficial. 75% respondents agreed that the course is industry-oriented and addresses employability skills. They noted that experiential learning of the curriculum enhance students' skills in keeping up with latest technological advancements. 75% respondents expressed satisfaction with the current curriculum. They mentioned that it effectively prepares students for the real-world requirements be it in industry, higher studies or entrepreneurship. 	<ul style="list-style-type: none"> Activities where students work on environment and sustainability issue were included in the curriculum. Approaches such as experiential learning and problem-based learning are particularly effective in realizing the program outcomes. The curriculum is designed with the input from various stake holders: Industry, academia, students and Alumni. To modernize the teaching-learning process Smart boards were procured for many classrooms. Faculties are encouraged to attend workshop, conferences, present/publish papers etc. Industry representatives are member of Board of studies (BoS). Every time syllabus is revised feedback are obtained from Industry to check it's relevance to ongoing Industry trends.

**Information Science and Engineering Department
Faculty Feedback Analysis on Curriculum**

2018-20

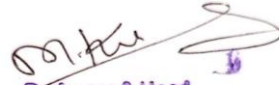

Programme : B. E.

Feedback Received	Action Taken
<p>1)Majority faculty expressed that the pedagogical approaches used in the curriculum should enhance student learning.</p> <p>2)Respondents indicated that the teaching methods employed in the curriculum promote student engagement. They appreciated Role play, simulations helped in achieving the course outcomes. However they also expressed that time and effort required by the teachers in carrying out these activities is very high.</p> <p>3)Respondents agreed that the curriculum for the course should be more structured and to the industry standards. They noted that the aligning with the industry requirements should be taken care of while designing the curriculum.</p>	<p>1) In addition to the existing approaches for learning. Activities where students work on societal cause issue were included in the curriculum.</p> <p>2)Workshops were conducted to train Faculties on pedagogical techniques such that they are comfortable to conducting and experimenting new teaching methods.</p> <p>3)Industry persons feedback was taken and they were included in the BOS.</p>

Dept of Mechanical Engineering

ACTION TAKEN: FACULTY FEEDBACK
Action Taken Report on Student Feedback received during 2018-19
Programme : B. E.

Faculty Feedback	Action taken
<p>1. How well the UG/PG curriculum aligns with the stated Program Outcomes (POs) of the ME program:</p> <p>2. How do you rate POs you believe are adequately addressed or emphasized in the curriculum?</p> <p>3. How well the pedagogical approaches used in the curriculum enhance student learning?</p> <p>4. How well the teaching methods employed in the curriculum promote student engagement?</p> <p>5. The curriculum for the course is well-structured and organized</p> <p>6. The sequencing of topics in the curriculum facilitates student understanding</p> <p>7. Adequate resources are available to support the delivery of the curriculum:</p> <p>8. As faculty you receive sufficient support to effectively teach the curriculum:</p> <p>9. Is the course industry-oriented/addresses employability/enhances the skills?</p> <p>10. Overall, I am satisfied with the current curriculum:</p>	<ul style="list-style-type: none"> ✓ Conduct in-depth examination of program outcomes to identify strengths and areas needing improvement ✓ Map program outcomes to the curriculum to identify alignment effectiveness and areas requiring adjustments ✓ Develop strategies for enhancement, including revising content, introducing new modules, or redesigning assessments ✓ Evaluate pedagogical approaches through feedback and student performance assessment ✓ Identify effective methods for enhancing learning, such as incorporating interactive activities or innovative teaching techniques ✓ Assess teaching methods' effectiveness in promoting engagement and identify strategies for improvement ✓ Review curriculum structure and organization to identify strengths and weaknesses ✓ Make adjustments to ensure seamless progression and comprehension ✓ Evaluate resource availability and faculty support to enhance curriculum delivery ✓ Advocate for additional resources and support mechanisms as needed ✓ Align course content with industry needs and employability to ensure relevance ✓ Collaborate with industry partners to integrate relevant skills and enhance employment prospects ✓ Review overall satisfaction ratings to identify areas for improvement ✓ Use feedback to inform potential curriculum changes for continuous enhancement.

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS

ATR of Faculty Feedback Analysis (2018-19)

Department	Stakeholder	Feedback received	Action taken
Department of Master of Computer Applications	Faculty	83% of the faculty members agree that courses are aligned and are sufficiently addressed in the curriculum	Self-Study, minor and Major projects are aligned and aimed towards societal, environmental and sustainable solution designs
		89% of the faculty members opined that the curriculum is well structured and sequenced. The mode of teaching through pedagogy and new approaches helps students in better understanding the courses	New tools and technologies usage is volunteered and encouraged among the faculty members. Integrated courses are taught through practical approach. Use of Git and GitHub is Encouraged for showcasing and wide reach of students learning
		24% of faculty opined that some improvement is needed and to incorporate the courses more relevant to industry	Discussions were made with alumni, employers and other stake holders to bring in the more industry-oriented topics into the curriculum.
